**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1, 3-9, and 11-18 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Staub et al. discloses the construction of gas cooled end turns for dynamoelectric machine rotor, comprising:

a rotor having a spindle extending axially beyond said at least one end of said body portion and defining an annular space with said endwindings, and a body portion, a rotor winding having axially extending coils and end turns defining a plurality of concentric endwindings extending axially beyond at least one end of said body portion, said endwindings and said spindle defining an annular space therebetween; and

at least one, or a plurality of spaceblocks located between adjacent said endwindings so as to define cavities, each bounded by adjacent spaceblocks and adjacent endwindings and open to said annular space; and each said spaceblock having:

first and second sidewalls engaging said adjacent endwindings,

an generally planar upstream wall,

a downstream wall, having a non-planar contour for reducing the extent and strength generated wake,

said spaceblock being comprised of a generally rectangular main body portion and a protrusion portion, said main body portion defining said upstream wall and said sidewall portions, and said protrusion portions defining said downstream wall.

The prior art of record, taken alone or in combination, fails to teach the construction of a gas cooled dynamoelectric machine as described on independent claims 1 and 9, wherein the spaceblock downstream wall has a convexly curved, aerodynamic contour for reducing the extent and strength of the generated wake.

Dependent claims 3-8 and 11-18 are considered allowable by their respective dependence on allowed independent claims 1 and 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
